

Recommendation Letter Prof. Roberto Iñiguez Flores

Dear members of the Cumulus Association Secretariat,

I warmly support the application of Professor Roberto Iñiguez Flores to join the Cumulus Executive Board VIII, for the 2022-2025 term.

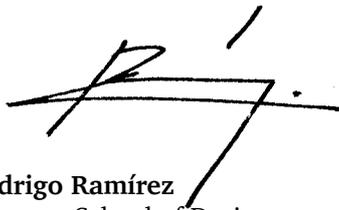

As the Director of the UC Chile School of Design, I've known Professor Iñiguez participating in forums and academic projects in Latin American region and Europe. In this period, he has been an active promoter of La Triada, a regional academic program conducted by Tec Monterrey, UC Chile, and Universidad de Los Andes Colombia, fostering collaboration and academic exchange.

Centered in anticipation processes, Prof. Iñiguez has given shape to a distinctive program in Design conducting undergraduate and graduate programs. His leadership has become evident as a Dean of the School of Architecture, Art and Design (EAAD) at Tecnológico de Monterrey, a nationwide scale project with operations in 19 cities along Mexico. His current research focuses on common topics for our academic communities, such as Advanced Design Cultures, how to develop advanced design competencies and the systemic attributes of design, materialized in his experience in innovation for industrial sectors such as furniture, consumer products and mobility.

I do remark his active participation as a member of different academic boards and conferences, such as the Latin Design Network, Design Principles & Practices, and our collaboration in initiatives such as the Winter School, an advanced design program in responsible design innovations, co-organized by Bologna University, Tec Monterrey and Diseño UC Chile. Such integrative workstyle constitutes a fundamental point for this support, bringing new opportunities to expand our regional connections towards a global scale.

Therefore, we enthusiastically recommend Professor Roberto Iñiguez as a member of the following Cumulus Executive Board.

Yours sincerely,

Rodrigo Ramírez
Director, School of Design
